SDH / SONET Explained in Functional Models: Modeling the Optical Transport Network Huub van Helvoort

H/SONET Explained in Functional Models represents a fresh approach to the modeling of transport network technologies. This practical guide and reference text uncovers the description of SDH (Synchronous Digital Hierarchy), SONET (Synchronous Optical Network) and OTN (Optical Transport Network) transport networks and equipment using functional/atomic modeling techniques. It clearly explains the use of models in the ITU-T and ETSI standards, the transport networks and the transport equipment in the definition, implementation and deployment phase.

- Pays particular attention to the SDH and OTN standards using functional/atomic modeling, as used and defined in the ITU-T (International Telecommunication Union) recommendations G.805 and G.809 and the ETSI (European Telecommunications Standards Institute) standards EN 300 417, as opposed to the formal language used in the ANSI (American National Standards Institute) standard T1.105.
- Topics of discussion range from functional modeling high level transport networks to the most detailed device functions, aided by a variety of figures and tables.
- Shows that functional modeling is not restricted to SDH/SONET but that it can be used to describe any transport network, connection-oriented and connectionless, e.g. Ethernet and MPLS networks.
- Written by a leading authority in the area, this is the first book dedicated to the novel approach of using functional modeling to describe SDH/SONET/OTN networks.

This volume will appeal to manufacturers, engineers and all those involved in developing and deploying SDH, SONET, OTN, Ethernet, MPLS technology. It will be an invaluable resource for postgraduate students on network communications courses and advanced users using functional modeling.

From reader reviews:

Deloras Pinkston:

Information is provisions for folks to get better life, information presently can get by anyone in everywhere. The information can be a knowledge or any news even a concern. What people must be consider if those information which is inside the former life are challenging be find than now is taking seriously which one works to believe or which one often the resource are convinced. If you receive the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take SDH / SONET Explained in Functional Models: Modeling the Optical Transport Network as the daily resource information.

Rick Braden:

Spent a free time for you to be fun activity to complete! A lot of people spent their spare time with their family, or their own friends. Usually they undertaking activity like watching television, planning to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? Can be reading a book might be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the guide untitled SDH / SONET Explained in Functional Models: Modeling the Optical Transport Network can be great book to read. May be it may be best activity to you.

Sue Joseph:

This SDH / SONET Explained in Functional Models: Modeling the Optical Transport Network is great e-book for you because the content that is certainly full of information for you who also always deal with world and still have to make decision every minute. This particular book reveal it details accurately using great arrange word or we can declare no rambling sentences inside. So if you are read the idea hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but tough core information with wonderful delivering sentences. Having SDH / SONET Explained in Functional Models: Modeling the Optical Transport Network in your hand like having the world in your arm, details in it is not ridiculous a single. We can say that no e-book that offer you world in ten or fifteen moment right but this publication already do that. So , this can be good reading book. Hi Mr. and Mrs. stressful do you still doubt this?

Kelly Jackson:

As we know that book is significant thing to add our expertise for everything. By a guide we can know everything you want. A book is a range of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This reserve SDH / SONET Explained in Functional Models: Modeling the Optical Transport Network was filled about science. Spend your free time to add your knowledge about your research competence. Some people has various feel when they reading the book. If you know how big

benefit from a book, you can feel enjoy to read a e-book. In the modern era like currently, many ways to get book that you just wanted.
