Causal Models in the Social Sciences

Causal Models in the Social Sciences

Causal models are formal theories stating the relationships between precisely defined variables, and have become an indispensable tool of the social scientist. This collection of articles is a course book on the causal modeling approach to theory construction and data analysis. H. M. Blalock, Jr. summarizes the then-current developments in causal model utilization in sociology, political science, economics, and other disciplines. This book provides a comprehensive multidisciplinary picture of the work on causal models. It seeks to address the problem of measurement in the social sciences and to link theory and research through the development of causal models.

Organized into five sections (Simple Recursive Models, Path Analysis, Simultaneous Equations Techniques, The Causal Approach to Measurement Error, and Other Complications), this volume contains twenty-seven articles (eight of which were specially commissioned). Each section begins with an introduction explaining the concepts to be covered in the section and links them to the larger subject. It provides a general overview of the theory and application of causal modeling.

Blalock argues for the development of theoretical models that can be operationalized and provide verifiable predictions. Many of the discussions of this subject that occur in other literature are too technical for most social scientists and other scholars who lack a strong background in mathematics. This book attempts to integrate a few of the less technical papers written by econometricians such as Koopmans, Wold, Strotz, and Fisher with discussions of causal approaches in the social and biological sciences. This classic text by Blalock is a valuable source of material for those interested in the issue of measurement in the social sciences and the construction of mathematical models.

From reader reviews:

Robert Stratton:

Inside other case, little folks like to read book Causal Models in the Social Sciences. You can choose the best book if you'd prefer reading a book. Given that we know about how is important any book Causal Models in the Social Sciences. You can add know-how and of course you can around the world by way of a book. Absolutely right, because from book you can realize everything! From your country until eventually foreign or abroad you will be known. About simple point until wonderful thing it is possible to know that. In this era, you can open a book or searching by internet unit. It is called e-book. You should use it when you feel uninterested to go to the library. Let's go through.

Joshua Stamper:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As you may know that book is very important for all of us. The book Causal Models in the Social Sciences was making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The e-book Causal Models in the Social Sciences is not only giving you far more new information but also to become your friend when you experience bored. You can spend your spend time to read your book. Try to make relationship together with the book Causal Models in the Social Sciences. You never truly feel lose out for everything should you read some books.

Millicent Doty:

In this 21st centuries, people become competitive in every single way. By being competitive at this point, people have do something to make all of them survives, being in the middle of the particular crowded place and notice through surrounding. One thing that often many people have underestimated that for a while is reading. Sure, by reading a guide your ability to survive enhance then having chance to endure than other is high. For you who want to start reading a new book, we give you this kind of Causal Models in the Social Sciences book as basic and daily reading guide. Why, because this book is greater than just a book.

Anthony Wilson:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from your book. Book is created or printed or outlined from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just looking for the Causal Models in the Social Sciences when you desired it?
