"[This book] has brought together information and real-life experiences of nurses who have disabilities. It will serve as an invaluable source of information on the impact of disability on the employment and retention of registered nurses."

Suzanne C. Smeltzer, EdD, RN, FAAN

This is the first research-based book to confront workplace issues facing nurses who have disabilities. It not only examines in-depth their experiences, roadblocks to successful employment, and misperceptions surrounding these nurses, but also provides viable solutions for creating positive attitudes towards them and a welcoming work environment that fosters hiring and retention. From the perspectives and actual voices of nurses with disabilities, nurse leaders, nurse administrators, and patients, the book identifies nurses with disabilities (including sensory, musculoskeletal, emotional, and mental health issues), discusses why they choose to leave nursing or hide their disabilities, and analyzes how their disabilities may influence career choices.

Written by the foremost researcher on nurses with disabilities, the book addresses patient safety, environmental factors, and retention strategies. It discusses why many nurses feel the need to conceal their disability even though it does not affect their ability to carry out their duties. It addresses interactions with colleagues, administrators, and patients and explores the common misperception that nurses with disabilities jeopardize patient safety. The text discusses potential solutions such as changing nursing education, altering nurse job description, and enhancing workplace accommodations. It seeks to influence nurse leaders and administrators, who have the power to institute change and retain nurses with disabilities, and will be a valuable asset to nursing classes in policy and leadership.
