## **Group Sequential and Confirmatory Adaptive Designs in Clinical Trials (Springer Series in Pharmaceutical Statistics) Gernot Wassmer, Werner Brannath**

This book provides an up-to-date review of the general principles of and techniques for confirmatory adaptive designs. Confirmatory adaptive designs are a generalization of group sequential designs. With these designs, interim analyses are performed in order to stop the trial prematurely under control of the Type I error rate. In adaptive designs, it is also permissible to perform a data-driven change of relevant aspects of the study design at interim stages. This includes, for example, a sample-size reassessment, a treatment-arm selection or a selection of a pre-specified sub-population.

Essentially, this adaptive methodology was introduced in the 1990s. Since then, it has become popular and the object of intense discussion and still represents a rapidly growing field of statistical research. This book describes adaptive design methodology at an elementary level, while also considering designing and planning issues as well as methods for analyzing an adaptively planned trial. This includes estimation methods and methods for the determination of an overall p-value. Part I of the book provides the group sequential methods that are necessary for understanding and applying the adaptive design methodology supplied in Parts II and III of the book. The book contains many examples that illustrate use of the methods for practical application.

The book is primarily written for applied statisticians from academia and industry who are interested in confirmatory adaptive designs. It is assumed that readers are familiar with the basic principles of descriptive statistics, parameter estimation and statistical testing. This book will also be suitable for an advanced statistical course for applied statisticians or clinicians with a sound statistical background.

### **From reader reviews:**

#### **Corrina Sutton:**

Book is usually written, printed, or illustrated for everything. You can learn everything you want by a guide. Book has a different type. As we know that book is important point to bring us around the world. Alongside that you can your reading ability was fluently. A e-book Group Sequential and Confirmatory Adaptive Designs in Clinical Trials (Springer Series in Pharmaceutical Statistics) will make you to end up being smarter. You can feel far more confidence if you can know about everything. But some of you think that will open or reading any book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you seeking best book or ideal book with you?

#### **Jennifer Tomasini:**

A lot of people always spent all their free time to vacation as well as go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read a book. It is really fun for yourself. If you enjoy the book you read you can spent 24 hours a day to reading a reserve. The book Group Sequential and Confirmatory Adaptive Designs in Clinical Trials (Springer Series in Pharmaceutical Statistics) it is very good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. Should you did not have enough space bringing this book you can buy typically the e-book. You can m0ore quickly to read this book from a smart phone. The price is not to fund but this book features high quality.

#### **Ruth Lynch:**

People live in this new time of lifestyle always try to and must have the spare time or they will get great deal of stress from both way of life and work. So , if we ask do people have time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will certainly unlimited right. Then ever try this one, reading books. It can be your alternative inside spending your spare time, the book you have read will be Group Sequential and Confirmatory Adaptive Designs in Clinical Trials (Springer Series in Pharmaceutical Statistics).

#### **Lillie Corley:**

In this age globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The health of the world makes the information better to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher this print many kinds of book. The actual book that recommended to your account is Group Sequential and Confirmatory Adaptive Designs in Clinical Trials (Springer Series in Pharmaceutical Statistics) this publication consist a lot of the information of the condition of this world now.

That book was represented so why is the world has grown up. The words styles that writer use to explain it is easy to understand. The particular writer made some investigation when he makes this book. This is why this book ideal all of you.
