**Enterprise Mac Managed Preferences** Edward Marczak, Greg Neagle

Many systems administrators on the Mac need a way to manage machine configuration after initial setup and deployment. Apple's Managed Preferences system (also known as MCX) is under-documented, often misunderstood, and sometimes outright unknown by systems administrators. MCX is usually deployed in conjunction with an OS X server, but it can also be used in Windows environments or where no dedicated server exists at all.

*Enterprise Mac Managed Preferences* is the definitive guide to Apple's Managed Client technology. With this book, you'll get the following:

- An example-driven guide to Mac OS X Managed Preferences/Client technology
- Recipes for common use case studies and patterns
- A targeted approach appropriate for any sys admin that manages Macs in an OS X or Windows environment

This is the only book that focuses on this facet of OS X exclusively. If you're a sys admin, this book will take away much of the pain of working with OS X client systems. Even better, both of the authors are very involved in the Mac community? **Greg Neagle** is part of the MacEnterprise steering committee, and **Ed Marczak** is the executive editor and an author for *MacTech* magazine and a member of the Apple Consultants Network.
