This investigation into the human abdomen, stomach, and intestines is packed with vivid high-quality, full-color photographs that provide a deep and textured view into the human midsection. The function and position of such body parts as the abdominal muscles, the ribs, the stomach, the intestines, and the colon are covered along with a discussion of the other organs involved in human digestion, such as the liver, the spleen, and the gallbladder. Combined with intense, 3D-like photographs, this tour of the human digestive system will help readers achieve a more complete understanding of how the stomach and surrounding organs work.
