For fifty years European integration has been pursued according to an operational code based on rules which have never been publicly discussed. This book demonstrates the far-reaching consequences of the prioritisation of integration over competing values, *fait accompli* and other implicit rules of action. The willingness to sacrifice democracy on the altar of integration is demonstrated by the monopoly of legislative initiative granted to the non-elected Commission. Monetary union preceding, rather than following, political integration is a striking example of *fait accompli*, and the reason behind many holes in the EU system of economic governance. Until now, academics have avoided radical criticism; Giandomenico Majone argues that only an open acknowledgement of the obsolescence of the traditional methods can stem the rising tide of Euro-scepticism.
