The thirty-eight science fiction and fantasy stories in this book contain a heavy dose of political and social satire similar to that found in the works of Jonathan Swift. On its pages you will learn about the second renaissance, which completely reversed the results of the first, and of the campaign to elect Vladimir Putin president of the U.S. Other stories describe the extraordinary things the leader of the first private exploratory mission to the moon learned about the inhabitants of that satellite and the "Washington Spring," which replicated the events of the "Arab Spring."
