Differential Analysis on Complex Manifolds: 65 (Graduate Texts in Mathematics)

Raymond O. Wells

Differential Analysis on Complex Manifolds: 65 (Graduate Texts in Mathematics) Raymond O. Wells

A brand new appendix by Oscar Garcia-Prada graces this third edition of a classic work. In developing the tools necessary for the study of complex manifolds, this comprehensive, well-organized treatment presents in its opening chapters a detailed survey of recent progress in four areas: geometry (manifolds with vector bundles), algebraic topology, differential geometry, and partial differential equations. Wells's superb analysis also gives details of the Hodge-Riemann bilinear relations on Kahler manifolds, Griffiths's period mapping, quadratic transformations, and Kodaira's vanishing and embedding theorems. Oscar Garcia-Prada's appendix gives an overview of the developments in the field during the decades since the book appeared.

From reader reviews:

Danny Exum:

This book titled Differential Analysis on Complex Manifolds: 65 (Graduate Texts in Mathematics) to be one of several books in which best seller in this year, this is because when you read this publication you can get a lot of benefit in it. You will easily to buy this kind of book in the book retailer or you can order it by way of online. The publisher of this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Smart phone. So there is no reason to your account to past this e-book from your list.

Leon King:

Reading a e-book can be one of a lot of action that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a publication will give you a lot of new data. When you read a reserve you will get new information since book is one of numerous ways to share the information as well as their idea. Second, reading a book will make an individual more imaginative. When you looking at a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, you could share your knowledge to other people. When you read this Differential Analysis on Complex Manifolds: 65 (Graduate Texts in Mathematics), you are able to tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire average, make them reading a publication.

Jessie Orlando:

Your reading 6th sense will not betray you actually, why because this Differential Analysis on Complex Manifolds: 65 (Graduate Texts in Mathematics) reserve written by well-known writer who knows well how to make book which might be understand by anyone who all read the book. Written inside good manner for you, leaking every ideas and producing skill only for eliminate your hunger then you still uncertainty Differential Analysis on Complex Manifolds: 65 (Graduate Texts in Mathematics) as good book not simply by the cover but also from the content. This is one e-book that can break don't evaluate book by its handle, so do you still needing one more sixth sense to pick this particular!?! Oh come on your reading through sixth sense already said so why you have to listening to another sixth sense.

Keely Charles:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And also you know that little person including reading or as reading become their hobby. You must know that reading is very important and also book as to be the thing. Book is important thing to include you knowledge, except your personal teacher or lecturer. You find good news or update with regards to something by book. Numerous books that can you choose to adopt be your object. One of them is actually Differential Analysis

on Complex Manifolds: 65 (Graduate Texts in Mathematics).
