Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) Michael Aschbacher, Radha Kessar, Bob Oliver
A fusion system over a p-group S is a category whose objects form the set of all subgroups of S, whose morphisms are certain injective group homomorphisms, and which satisfies axioms first formulated by Puig that are modelled on conjugacy relations in finite groups. The definition was originally motivated by representation theory, but fusion systems also have applications to local group theory and to homotopy theory. The connection with homotopy theory arises through classifying spaces which can be associated to fusion systems and which have many of the nice properties of p-completed classifying spaces of finite groups. Beginning with a detailed exposition of the foundational material, the authors then proceed to discuss the role of fusion systems in local finite group theory, homotopy theory and modular representation theory. The book serves as a basic reference and as an introduction to the field, particularly for students and other young mathematicians.

From reader reviews:

Dwight Ivers:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their spare time to take a go walking, shopping, or went to often the Mall. How about open as well as read a book entitled Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391)? Maybe it is for being best activity for you. You know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have other opinion?

Trina Durham:

What do you regarding book? It is not important with you? Or just adding material when you need something to explain what the one you have problem? How about your time? Or are you busy person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They have to answer that question mainly because just their can do this. It said that about guide. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need that Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) to read.

Bruno Reed:

The book Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) has a lot of knowledge on it. So when you make sure to read this book you can get a lot of gain. The book was authored by the very famous author. This articles author makes some research ahead of write this book. That book very easy to read you can get the point easily after reading this book.

Virginia Berry:

It is possible to spend your free time to read this book this e-book. This Fusion Systems in Algebra and Topology (London Mathematical Society Lecture Note Series, Vol. 391) is simple bringing you can read it in the area, in the beach, train and also soon. If you did not get much space to bring the actual printed book, you can buy often the e-book. It is make you easier to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when you buy this book.
