**A Chinese Physician: Wang Ji and the Stone Mountain Medical Case Histories (Needham Research Institute Series)** Joanna Grant

*A Chinese Physician* is the portrait of a 16th century medical writer and clinical practitioner. Drawing on socio-economic/biographic, textual, and gender analysis along side a variety of sources, from hagiographical biographies to medical case histories, the book tells three very different but complementary stories about what it was to practise medicine in 16th century China. Woven together, these stories combine to create a multi-dimensional portrayal that brings to life the very human experiences, frustrations and aspirations of a well respected and influential physician who struggled to win respect from fellow practitioners and loyalty from patients. The book creates a vibrant and colourful picture of contemporary medical practice and at the same time deepens our understanding of the interrelationship between gender culture and medicine.
