Satellite Communication Systems Design

Satellite Communication Systems Design

Writing a comprehensive book on satellite communications requires the command of many technical disciplines and the availability of up-to-date information on international recommendations, system architectures, and equipment standards. It is therefore necessary to involve many authors, each possessing a good level of knowledge in a particular discipline. The problem of using a coherent and unambiguous set of definitions and basic terms has been solved by including in the book all the background information needed for understanding satellite communication systems, without any major reference to other textbooks specializing in particular disciplines. The obvious consequence of this approach has been the large size of the book, with the advantages, however, of practically complete independence from other books, more systematic discussion of the subject matter, and better readability. After the required background information, emphasis has been placed on the discussion of techniques and system design criteria rather than on specific equipment implementation or description of particular systems. The book may be divided in five parts as follows:

- The first five chapters provide most of the required background information.
- Chapter 6 is an introductory outline of satellite communication systems.
- Chapters 7 to 13 deal with the various aspects of technical system design.
- Chapter 14 discusses system economics.
- Chapter 15 provides a brief insight into some foreseeable future developments of satellite communications.

From reader reviews:

Joe Bell:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a wander, shopping, or went to often the Mall. How about open or read a book called Satellite Communication Systems Design? Maybe it is being best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have some other opinion?

Patsy Hall:

In this 21st one hundred year, people become competitive in every single way. By being competitive currently, people have do something to make these survives, being in the middle of the actual crowded place and notice through surrounding. One thing that at times many people have underestimated the idea for a while is reading. That's why, by reading a e-book your ability to survive improve then having chance to endure than other is high. For you personally who want to start reading a new book, we give you this particular Satellite Communication Systems Design book as beginner and daily reading guide. Why, because this book is more than just a book.

Tony Paulson:

Now a day those who Living in the era where everything reachable by interact with the internet and the resources included can be true or not require people to be aware of each data they get. How individuals to be smart in having any information nowadays? Of course the solution is reading a book. Studying a book can help individuals out of this uncertainty Information specifically this Satellite Communication Systems Design book because this book offers you rich facts and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it everbody knows.

Shirley Arrington:

Information is provisions for those to get better life, information currently can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider any time those information which is inside former life are challenging be find than now's taking seriously which one is acceptable to believe or which one the resource are convinced. If you receive the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Satellite Communication Systems Design as the daily resource information.
