Thomas Dean

Talking with Computers: Explorations in the Science and Technology of Computing Thomas Dean

Thomas Dean explores a wide range of fundamental topics in computer science, from digital logic and machine language to artificial intelligence and the World Wide Web, explaining how computers and computer programs work and how the various subfields of computer science are interconnected. Dean touches on a number of questions including: How can a computer learn to recognize junk email? What happens when you click on a link in a browser? How can you program a robot to do two things at once? Are there limits to what computers can do? Dean encourages readers to experiment with short programs and fragments of code written in several languages to strip away the mystery and reveal the underlying computational ideas. The accompanying website (www.cs.brown.edu/tld/talk) provides access to code fragments, tips on finding and installing software, links to online resources, and exercises. Throughout Talking With Computers, Dean conveys his fascination with computers and enthusiasm for working in a field that has changed almost every aspect of our daily lives. Thomas Dean is Professor in the Computer Science Department at Brown University, where he served as Acting Vice President for Computing and Information Services from 2001-2002. He is co-author of Planning and Control (Morgan-Kaufman, 1991) and Artificial Intelligence: Theory and Practice (Addison-Wesley, 1995).

From reader reviews:

Gloria Robey:

Have you spare time to get a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a wander, shopping, or went to the actual Mall. How about open or perhaps read a book eligible Talking with Computers: Explorations in the Science and Technology of Computing? Maybe it is being best activity for you. You recognize beside you can spend your time using your favorite's book, you can better than before. Do you agree with it is opinion or you have other opinion?

Marsha Cox:

Spent a free a chance to be fun activity to perform! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, going to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? May be reading a book is usually option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the publication untitled Talking with Computers: Explorations in the Science and Technology of Computing can be excellent book to read. May be it may be best activity to you.

Rona Foret:

Precisely why? Because this Talking with Computers: Explorations in the Science and Technology of Computing is an unordinary book that the inside of the book waiting for you to snap that but latter it will zap you with the secret this inside. Reading this book alongside it was fantastic author who have write the book in such remarkable way makes the content inside of easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of gains than the other book have got such as help improving your ability and your critical thinking approach. So , still want to postpone having that book? If I were you I will go to the reserve store hurriedly.

Mark Smith:

This Talking with Computers: Explorations in the Science and Technology of Computing is great e-book for you because the content which can be full of information for you who have always deal with world and get to make decision every minute. This specific book reveal it information accurately using great coordinate word or we can state no rambling sentences within it. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but tough core information with splendid delivering sentences. Having Talking with Computers: Explorations in the Science and Technology of Computing in your hand like keeping the world in your arm, details in it is not ridiculous just one. We can say that no reserve that offer you world throughout ten or fifteen tiny right but this reserve already do that.

So , it is good reading book. Hey Mr. and Mrs. occupied do you still doubt in which?
