Normally-Off Computing

Normally-Off Computing

As a step toward ultimate low-power computing, this book introduces normally-off computing, which involves inactive components of computer systems being aggressively powered off with the help of new non-volatile memories (NVMs). Because the energy consumption of modern information devices strongly depends on both hardware and software, co-design and co-optimization of hardware and software are indispensable to improve energy efficiency.

The book discusses various topics including (1) details of low-power technologies including power gating, (2) characteristics of several new-generation NVMs, (3) normally-off computing architecture, (4) important technologies for implementing normally-off computing, (5) three practical implementations: healthcare, mobile information devices, and sensor network systems for smart city applications, and (6) related research and development.

Bridging computing methodology and emerging memory devices, the book is designed for both hardware and software designers, engineers, and developers as comprehensive material for understanding normally-off computing.

From reader reviews:

Mark Armstrong:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each e-book has different aim or maybe goal; it means that publication has different type. Some people feel enjoy to spend their a chance to read a book. They are reading whatever they get because their hobby is usually reading a book. Consider the person who don't like studying a book? Sometime, particular person feel need book whenever they found difficult problem as well as exercise. Well, probably you will want this Normally-Off Computing.

James Sellers:

Is it anyone who having spare time after that spend it whole day through watching television programs or just telling lies on the bed? Do you need something totally new? This Normally-Off Computing can be the respond to, oh how comes? A book you know. You are so out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these guides have than the others?

Lisa Potter:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Normally-Off Computing can make you experience more interested to read.

Steven Delorme:

What is your hobby? Have you heard that will question when you got pupils? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every person has different hobby. So you know that little person such as reading or as looking at become their hobby. You need to know that reading is very important and book as to be the matter. Book is important thing to increase you knowledge, except your own teacher or lecturer. You find good news or update in relation to something by book. Many kinds of books that can you choose to use be your object. One of them are these claims Normally-Off Computing.
