The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) Kexiang Xu, Kinkar Ch. Das, Nenad Trinajstić

This is the first book to focus on the topological index, the Harary index, of a graph, including its mathematical properties, chemical applications and some related and attractive open problems. This book is dedicated to Professor Frank Harary (1921—2005), the grandmaster of graph theory and its applications. It has been written by experts in the field of graph theory and its applications. For a connected graph G , as an important distance-based topological index, the Harary index $H(G)$ is defined as the sum of the reciprocals of the distance between any two unordered vertices of the graph G . In this book, the authors report on the newest results on the Harary index of a graph. These results mainly concern external graphs with respect to the Harary index; the relations to other topological indices; its properties and applications to pure graph theory and chemical graph theory; and two significant variants, i.e., additively and multiplicatively weighted Harary indices. In the last chapter, we present a number of open problems related to the Harary index. As such, the book will not only be of interest to graph researchers, but to mathematical chemists as well.

From reader reviews:

Willie Carlos:

This The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) book is simply not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book will be information inside this book incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. That The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) without we know teach the one who examining it become critical in contemplating and analyzing. Don't end up being worry The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) can bring if you are and not make your bag space or bookshelves' come to be full because you can have it inside your lovely laptop even cellphone. This The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) having great arrangement in word as well as layout, so you will not sense uninterested in reading.

Earnest Koontz:

Spent a free time and energy to be fun activity to complete! A lot of people spent their spare time with their family, or all their friends. Usually they doing activity like watching television, gonna beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? May be reading a book could be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try look for book, may be the guide untitled The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) can be excellent book to read. May be it might be best activity to you.

Julio Huntsman:

Do you like reading a publication? Confuse to looking for your selected book? Or your book ended up being rare? Why so many concern for the book? But almost any people feel that they enjoy intended for reading. Some people likes examining, not only science book but in addition novel and The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) or perhaps others sources were given expertise for you. After you know how the fantastic a book, you feel would like to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to include their knowledge. In other case, beside science reserve, any other book likes The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) to make your spare time considerably more colorful. Many types of book like this.

Catharine Rosol:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from a book. Book is created or printed or outlined from each source that filled update of news. In this particular modern era like today, many ways to get information are available for you actually. From media social like

newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just looking for the The Harary Index of a Graph (SpringerBriefs in Applied Sciences and Technology) when you necessary it?
