## Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses) Hua-Sheng Shao

This book focuses on the study of heavy quarkonium production at high-energy colliders as a useful tool to explain both the perturbative and non-perturbative aspects of quantum chromodynamics. It provides the first comprehensive comparison between the theory and recent experiments and clarifies some longstanding puzzles in the heavy quarkonium production mechanism. In addition, it describes in detail a new framework for implementing precise computations of the physical observables in quantum field theories based on recently developed techniques. It can be used to simulate the complicated collider environment of the Large Hadron Collider at the Conseil Européen pour la Recherche Nucléaire (CERN). Its accomplishment implies that the Monte Carlo simulations for high-energy physics experiments have reached the limits of precision. It offers readers a wealth of valuable information on the relevant techniques.

### **From reader reviews:**

#### **Nancy Tandy:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses). Try to make book Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses) as your close friend. It means that it can being your friend when you experience alone and beside associated with course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know anything by the book. So , we need to make new experience along with knowledge with this book.

#### **Teresita Donahue:**

Hey guys, do you really wants to finds a new book to learn? May be the book with the name Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses) suitable to you? Often the book was written by well known writer in this era. Typically the book untitled Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses)is one of several books this everyone read now. This book was inspired many men and women in the world. When you read this reserve you will enter the new way of measuring that you ever know just before. The author explained their plan in the simple way, so all of people can easily to recognise the core of this e-book. This book will give you a lots of information about this world now. To help you see the represented of the world on this book.

#### **Virginia Higgins:**

In this particular era which is the greater man or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple approach to have that. What you need to do is just spending your time very little but quite enough to experience a look at some books. One of many books in the top list in your reading list is usually Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses). This book and that is qualified as The Hungry Inclines can get you closer in getting precious person. By looking upward and review this guide you can get many advantages.

#### **Elizabeth Johannes:**

A number of people said that they feel fed up when they reading a guide. They are directly felt this when they get a half portions of the book. You can choose often the book Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses) to make your own reading is interesting. Your current skill of reading expertise is developing when you like

reading. Try to choose straightforward book to make you enjoy to learn it and mingle the impression about book and studying especially. It is to be first opinion for you to like to open up a book and examine it. Beside that the publication Heavy Quarkonium Production Phenomenology and Automation of One-Loop Scattering Amplitude Computations (Springer Theses) can to be your brand new friend when you're truly feel alone and confuse in what must you're doing of their time.
