Film Text Analysis: New Perspectives on the Analysis of Filmic Meaning (Routledge Advances in Film Studies)

This book examines film as a multimodal text and an audiovisual synthesis, bringing together current work within the fields of narratology, philosophy, multimodal analysis, sound as well as cultural studies in order to cover a wide range of international academic interest. The book provides new insights into current work and turns the discussion towards recent research questions and analyses, representing and constituting in each contribution new work in the discipline of film text analysis. With the help of various example analyses, all showing the methodological applicability of the discussed issues, the collection provides novel ways of considering film as one of the most complex and at the same time broadly comprehensible texts.
