Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science) Keith Knight

Traditional texts in mathematical statistics can seem - to some readers-heavily weighted with optimality theory of the various flavors developed in the 1940s and 50s, and not particularly relevant to statistical practice. Mathematical Statistics stands apart from these treatments. While mathematically rigorous, its focus is on providing a set of useful tools that allow students to understand the theoretical underpinnings of statistical methodology.

The author concentrates on inferential procedures within the framework of parametric models, but - acknowledging that models are often incorrectly specified - he also views estimation from a non-parametric perspective. Overall, Mathematical Statistics places greater emphasis on frequentist methodology than on Bayesian, but claims no particular superiority for that approach. It does emphasize, however, the utility of statistical and mathematical software packages, and includes several sections addressing computational issues.

The result reaches beyond "nice" mathematics to provide a balanced, practical text that brings life and relevance to a subject so often perceived as irrelevant and dry.

From reader reviews:

Robert Miller:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each guide has different aim or goal; it means that e-book has different type. Some people feel enjoy to spend their time to read a book. They are reading whatever they get because their hobby is definitely reading a book. What about the person who don't like looking at a book? Sometime, man or woman feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will require this Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science).

Amanda Lara:

The book Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science) make one feel enjoy for your spare time. You need to use to make your capable considerably more increase. Book can for being your best friend when you getting anxiety or having big problem using your subject. If you can make reading through a book Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science) to get your habit, you can get a lot more advantages, like add your capable, increase your knowledge about a number of or all subjects. You can know everything if you like open up and read a book Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science). Kinds of book are a lot of. It means that, science e-book or encyclopedia or other people. So, how do you think about this book?

Irving Wile:

What do you concerning book? It is not important to you? Or just adding material when you want something to explain what yours problem? How about your spare time? Or are you busy man? If you don't have spare time to complete others business, it is make one feel bored faster. And you have free time? What did you do? Everybody has many questions above. They must answer that question since just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is suitable. Because start from on guardería until university need this kind of Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science) to read.

Michael Kenney:

Reading a e-book tends to be new life style in this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Having book everyone in this world can certainly share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write with their book. One of them is this Mathematical Statistics (Chapman & Hall/CRC Texts in Statistical Science).
