**Handbook of Research Methods and Applications in Empirical Finance (Handbooks of Research Methods and Applications series)** Adrian R. Bell, Chris Brooks, Marcel Prokopczuk

This impressive *Handbook* presents the quantitative techniques that are commonly employed in empirical finance research together with real-world, state-of-the-art research examples.

Written by international experts in their field, the unique approach describes a question or issue in finance and then demonstrates the methodologies that may be used to solve it. All of the techniques described are used to address real problems rather than being presented for their own sake, and the areas of application have been carefully selected so that a broad range of methodological approaches can be covered.

The *Handbook* is aimed primarily at doctoral researchers and academics who are engaged in conducting original empirical research in finance. In addition, the book will be useful to researchers in the financial markets and also advanced Masters-level students who are writing dissertations.
