# Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1)

*P.T. Haromy, W.N. Hunter, O. Kennard, W. Saenger, M. Sundaralingam*

**Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1)** P.T. Haromy, W.N. Hunter, O. Kennard, W. Saenger, M. Sundaralingam

Group VII of the Landolt-Börnstein New series is devoted to the physical properties of biological systems. It begins with volume VII/1 covering the nucleic acids which are of central importance in all processes involving gene expression. This field has become of practical consequence during the last decade through the development of genetic engineering. Because of the amount of the data available, volume VII/1 had to be divided into several subvolumes. The first two subvolumes, VII/1a and VII/1b, deal with crystallographic and structural data which give a comprehensive information on the three-dimensional structure of the nucleic acids, their folding properties, their hydrogen bonding schemes, their metal binding capabilities, their hydration and their drug complexation. The present subvolume VII/1a treats nomenclature and definitions in the field of nucleic acids, followed by the structure data of bases, nucleosides, nucleotides, and oligonucleotides. The basic foundations of nucleic acid structure are laid in this subvolume. Subvolume VII/1b which is to follow shortly, is concerned with the relevant data on fiber structures of DNA and RNA, on complexes between nucleotides and metal-ions and between oligonucleotides and drugs, and on hydrogen bonding of the nucleic acid constituents.

**From reader reviews:**

**Lori Thomas:**

As people who live in the actual modest era should be upgrade about what going on or facts even knowledge to make them keep up with the era which is always change and make progress. Some of you maybe will update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know which one you should start with. This Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1) is our recommendation to make you keep up with the world. Why, because book serves what you want and need in this era.

**Susan Swain:**

The reserve untitled Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1) is the book that recommended to you to see. You can see the quality of the publication content that will be shown to you. The language that article author use to explained their ideas are easily to understand. The author was did a lot of analysis when write the book, so the information that they share to your account is absolutely accurate. You also can get the e-book of Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1) from the publisher to make you far more enjoy free time.

**Anthony Lucas:**

Typically the book Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1) has a lot of knowledge on it. So when you check out this book you can get a lot of gain. The book was authored by the very famous author. This articles author makes some research prior to write this book. This specific book very easy to read you may get the point easily after reading this book.

**Jesse Mansell:**

Your reading 6th sense will not betray an individual, why because this Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1) reserve written by well-known writer who really knows well how to make book which can be understand by anyone who read the book. Written in good manner for you, dripping every ideas and creating skill only for eliminate your own hunger then you still hesitation Crystallographic and Structural Data I / Kristallographische und strukturelle Daten I (Landolt-

Börnstein: Numerical Data and Functional Relationships in Science and Technology - New Series) (Vol 1) as good book not only by the cover but also through the content. This is one guide that can break don't ascertain book by its protect, so do you still needing one more sixth sense to pick this!?! Oh come on your studying sixth sense already said so why you have to listening to an additional sixth sense.
