**Transplant Immunology** Xian C. Li, M. Jevnikar Anthony

With all the complex issues of acceptance or rejection of a transplanted organ, immunology is a key subject for all transplantation clinicians. During recent years, there has been an explosion of research and knowledge in this area.

Produced in association with the American Society of Transplantation, and written by experts within the field, *Transplant Immunology* provides a comprehensive overview of the topic in relation to clinical transplantation.

Starting with the basic functionality of the immune system, it then moves on to cover the very latest developments in immunosuppressive drugs and protocols, as well as a look at all emerging technologies in the field.

Key chapters include:

- Transplant-related complications
- Immune responses to transplants
- Emerging issues in transplantation
- Biomarkers of Allograft rejection and tolerance
- T cells and the principles of immune responses

In full colour throughout, over 100 outstanding diagrams support the text, all figures being fully downloadable via the book's companion website. The result is an essential tool for all those responsible for managing patients awaiting and undergoing organ transplantation, including transplant surgeons and clinicians, immunologists and researchers.
